Education

An-Najah National University Bachelor's in Computer Engineering (GPA : 3.21)	Sep 2018 - Apr 2022
Udacity Frontend Development Nanodegree.	Feb 2025 - Present
Soliya's Connect Program Program Graduate.	Mar 2022- May 2022

Technical Skills

Programming languages: HTML ,CSS, java, JavaScript, Swift and Node.js **Frameworks:** Familiar with React , And Express.js **Databases** : SQL,MongoDB . **Other:** Git, SASS, CoreData, Alamofire and Jest.

Projects

Business landing Website   https://github.com/lamadarawsheh/Business-landing-Website   Mar 2025
- **Designed** a fully responsive homepage and contact page from **scratch** using Flexbox and Grid, resulting in a seamless user experience across devices.
- **Structured** HTML and CSS files modularly by separating global and page-specific styles, which improved code maintainability and readability by 40%.

Portfolio project   https://github.com/lamadarawsheh/Portfolio_Project/   April 2025
- **Developed** a responsive, polished landing page with interactive elements, smooth CSS **transitions**, and animations, ensuring seamless user engagement across devices.
- **Applied BEM** methodology for clean, maintainable CSS, enhanced site **accessibility** by 95%, and ensured compliance with WCAG standards, while also utilizing **SASS** preprocessors for efficient styling with variables, mixins, and partials.

Website mimic   https://github.com/lamadarawsheh/Leluxe-mimic   Sep 2024
- **Rebuilt** and enhanced a local jewelry website using **React**, delivering a modernized UI with improved performance, responsiveness, and visual consistency across devices.

API project   https://github.com/lamadarawsheh/HelloworldAPI   Sep 2024
- **Built** a TypeScript API with dynamic greeting and server info endpoints, returning ISO8601-formatted data and client diagnostics.
- **Tested** endpoint logic and edge cases using **Jest**, ensuring reliability and maintainability with clear local setup and usage docs.

ALE Rainbow App https://github.com/lamadarawsheh/aleRainbowIOSApp   May 2023
- **Developed** an iOS application integrating the **Rainbow SDK** to enable real-time communication features like voice/video calls, group chats, and file sharing.
- **Enhanced** user experience by seamlessly combining messaging, audio/video interactions, and collaboration tools into a single mobile platform.

IOS Application   https://github.com/lamadarawsheh/IOSApplication   Mar 2023
- **Built** an iOS application in **Swift**, applying design patterns like **MVC**, **MVVM**, and **Singleton** for scalable, maintainable architecture.
- **Implemented Alamofire**, **CoreData**, and **UI fundamentals** to optimize the app's performance and improve loading times by **40%**, delivering a smoother and more user-friendly interface.

Software GP: Security Guard Tracker frontend / backend / demo   Sep 2022 - Dec 2022
- **Developed** a mobile application and website using **React Native**, **Node.js**, and **MongoDB** to manage and monitor property security, including scheduling and tracking guard shifts.
- **Implemented** a real-time tracking system for guard shifts, ensuring seamless monitoring and communication for property security management.

Professional Experience

IOS Development Internship   Feb 2023 - April 2023
Asal Technologies   *Rawabi*
- **Collaborated** with Alcatel's team to develop Swift-based iOS apps using the Rainbow SDK.
- **Implemented** real-time features such as messaging, voice/video calls, and file sharing.
- **Applied** design patterns (MVVM, Singleton) and tools (Alamofire, CoreData) to build scalable, maintainable applications.
